

DiaStream

A/V BLOODLINE SYSTEM

DiaStream

B. BRAUN AVITUM

B. Braun Avitum, a division of B. Braun Melsungen AG, has been one of the leading suppliers of dialysis technology for over 30 years. In our role as a global full-spectrum provider for extracorporeal blood treatment, we provide dialysis facilities with products and services for almost all aspects of the blood-purification process.

In combination with our machines, dialyzers, concentrates and vascular access, our bloodlines provide you with a complete system for successful hemodialysis treatment.

YOUR NEEDS ARE FIRST IN LINE

We do not merely create bloodlines, we endeavor to create the highest possible user satisfaction.

EFFECTIVENESS & SAFETY

of treatment using high-quality products manufactured and developed consistently for 30 years.

A LINE FOR YOUR HEALTH. IN LINE WITH YOUR NEEDS.

RELIABLE & SUSTAINABLE,

with 175 years of experience in the medical field.
You work with a reliable partner taking care of your needs.

EFFECTIVE TREATMENT

Our bloodlines are designed by experts in the field for efficient performance with our machines for your long-term care.

INCREASED SAFETY

Safety features in combination with our B. Braun dialysis machines:

- The safety air detector is designed to prevent air embolism

DEHP FREE

We provide a DEHP-free portfolio, reducing health risks and adverse health effects.¹

BIOCOMPATIBILITY

All contacting materials are tested to ensure biocompatibility.

SIMPLIFIED USABILITY

Providing various configurations for all dialysis treatments with pre-connected components, reducing handling time and effort.

INFECTION CONTROL

With closed systems for infection control and preventing transmission of blood-borne pathogens.

NSI PREVENTION

A needle-free valve² to protect caregivers from needlestick injuries.

We do not merely create bloodlines, we endeavor to create the highest possible user satisfaction.

BLOODLINE COMPONENTS

VENOUS BUBBLE CATCHER

- Filter in the chamber to make certain blood clots are captured, ensuring patient safety

PINCH CLAMPS

- Color-coded components with no blood contact
- Small and medium-sized clamps for easy handling and one-handed activation with minimal effort

PATIENT CONNECTORS

- Self-unlocking connectors that can be easily removed with one hand
- Color-coded to identify venous and arterial access

DIALYZER CONNECTOR

- New smaller connector design minimizes contact of blood with masterbatch
- Ergonomic design for safe and easy connection to the dialyzer

PRESSURE BEFORE ENTRY (PBE)

- Predialyzer pressure monitoring
- Clotting management through monitoring the secondary membrane pressure in the dialyzer¹

INJECTION PORTS

- Easy handling with finger grip and protection against accidental needlesticks
- Specially designed to prevent needles penetrating the T-connection of the service line

ARTERIAL BUBBLE CATCHER

- Specially designed to minimize blood turbulence and reduce formation of foam
